

Figma Wireframe Planning

The goal of the wireframe is to plan the structure, layout, and user flow of the coworking workspace website before starting development.

A wireframe acts as the blueprint of the application and helps organize:

- Navigation
- Page layouts
- User interactions
- Features required for the MVP

Main Pages to Include in the Figma Wireframe

Required Pages Included in the Wireframe

The wireframe document includes the following required pages:

- Landing Page
- Registration Page
- Login Page
- Add Property Page
- Add Workspace Page
- List of Workspaces Page
- My Properties Page

1. Home Page

Purpose

The home page introduces the platform and allows users to:

- Search for workspaces
- Log in
- Sign up

Elements to Include

- Logo/title
- Navigation bar
- Hero section
- Search bar
- Login button
- Sign up button

- Featured workspace cards
- Footer

Layout Example

LOGO Home | Search | Login | Sign Up

Find Your Perfect Workspace

[Search by city/neighborhood]

[Search Button]

Featured Workspaces

[Workspace Card] [Workspace Card] [Workspace Card]

Footer

2. Sign Up / Login Page

Purpose

Allows users to create an account or log in.

Elements to Include

- Name input
- Email input
- Phone input
- Password input
- Role selection:
 - Owner
 - Coworker
- Create account button

Layout Example

Create Account

Name: _____

Email: _____

Phone: _____

Password: _____

Role:

(o) Owner

(o) Coworker

[Create Account]

3. Owner Dashboard

Purpose

Allows owners to manage properties and workspaces.

Elements to Include

- Dashboard title
- Add Property button
- My Properties section
- My Workspaces section
- Edit/Delete buttons

Layout Example

Dashboard

[Add Property]

My Properties

Property Card
- Address
- Neighborhood
[Edit] [Delete]

4. Add Property Page

Purpose

Allows owners to create property listings.

Elements to Include

- Address field
- Neighborhood field
- Square feet field
- Parking garage checkbox
- Public transportation checkbox
- Save button

Layout Example

Add Property

Address: _____

Neighborhood: _____

Square Feet: _____

Parking Garage:

☐ Yes

Near Transit:

☐ Yes

[Save Property]

5. Add Workspace Page

Purpose

Allows owners to add workspaces to their properties.

Elements to Include

- Workspace type dropdown
- Seating capacity input
- Smoking allowed selection
- Availability date picker
- Lease term dropdown
- Price input
- Save workspace button

Layout Example

Add Workspace

Type:

[Meeting Room ▼]

Seats: _____

Smoking Allowed:

(o) Yes

(o) No

Availability Date:

[Calendar]

Lease Term:

[Day ▼]

Price: _____

[Save Workspace]

6. Search Results Page

Purpose

Allows coworkers to search and filter workspaces.

Filters to Include

- Neighborhood
- Price
- Seats
- Parking
- Public transportation

Layout Example

Filters | Workspace Results

Price | Workspace Card

Seats | Image

Parking | Price

Transit | Seats

| [View Details]

7. Workspace Details Page

Purpose

Displays complete information about a selected workspace.

Elements to Include

- Workspace image
- Workspace type
- Seating capacity
- Price
- Parking information
- Transit information
- Availability date
- Owner contact information
- Contact owner button

Layout

Workspace Image

Private Office

Seats: 4

Price: \$700/month
